WHY THIS ASSET FITS

1. Strategic Geographic Focus

Corporate SA specialises in **precise targeting within localised South African towns and dense commuter hubs**. Germiston's Primrose area represents exactly this demographic – high-traffic commuter zone with strong local community presence.

Your strength lies in **commuter zones, townships, and dense urban areas**. This corner location on a main market street delivers precisely that audience.

2. Portfolio Expansion

With over 18,000 advertising panels across South Africa and 4,000 across eight African countries, this 30-metre mural would be a valuable addition to your inventory – particularly in the East Rand/Germiston corridor where you may have gaps.

3. Programmatic and Digital Integration

For those invested heavily in **digital infrastructure and programmatic buying**. While this is a static mural, its prime location could serve as anchor advertising while your digital assets in the area capture commuters at other touchpoints.
