CHINA PARTNERSHIP – COMPANY PROFILES

Document Reference: LICC/INT/CHINA-PROFILES-001

Version: 1.0

Date: 19 March 2026

Prepared by: International Partnerships Coordinator

Status: Active Outreach Document

SECTION A: PROFILE INDEX

Priority	Company	Sector	Location	Page
1	Chung Fung Metal	Steel Manufacturing	Nigel, Gauteng	2
2	Sedna International (with Chinese partners Autowei & Wuhan Huayu)	Plastic Recycling / Pyrolysis	Cape Town + Hong Kong	4
3	Sinosteel / China Baowu Steel Group	Steel / Mining	Johannesburg + Beijing	6
4	Global Plastics Innovation Programme (UNDP)	Programme / Funding	Multi-country	8

SECTION B: COMPANY PROFILES

PROFILE #001: CHUNG FUNG METAL

Field	Details
Priority Level	HIGHEST – DIRECT LOCAL MATCH

Field	Details
Company Name	Chung Fung Metal
Sector	Steel Manufacturing
Parent / Backing	Chinese government-invested enterprise
South African Location	Kaydale industrial zone, Nigel, Gauteng
Distance from LICC	Approximately 30-40 km (30-40 minutes' drive)

Contact Details

Information	Status	
Physical Address	Kaydale industrial zone, Nigel, Gauteng	✓
Telephone	To be researched	⌚
Email	To be researched	⌚
Website	To be researched	⌚
Key Contact Person	To be identified (General Manager / CSR Manager)	⌚

Business Overview

Chung Fung Metal has built a **ZAR 2.5 billion steel plant** in Nigel, Gauteng, with test runs completed and full production imminent . Key facts:

Metric	Detail
Investment	ZAR 2.5 billion

Metric	Detail
Production Capacity	600,000 tonnes/year of long-steel products
Technology	Electric arc furnace (EAF) – lower carbon emissions than traditional blast furnaces
Environmental Compliance	80% water recovery rate, zero liquid discharge target
Employment Created	1,000 jobs to date, targeting 1,200 at full production
Location Advantage	Kaydale industrial zone with convenient transport routes and port connections

Strategic Importance to South Africa's Steel Sector

The plant brings renewed momentum to South Africa's struggling steel sector, which has faced rising energy costs and competition from cheaper imports. Major producer ArcelorMittal South Africa (AMSA) has recently halted operations at several plants due to financial pressure. Chung Fung Metal's investment could help meet steel demand for infrastructure and housing projects.

Relevance to LICC

Factor	Assessment
Geographic Proximity	✅ Excellent – Nigel is just 30-40km from Germiston
Sector Alignment	✅ Direct match – steel fabrication for Programme 4 (Skills Development)
Skills Transfer Potential	✅ High – opportunity for site visits, training, possible equipment sponsorship

Factor	Assessment
Housing Materials Alignment	✅ Strong – potential collaboration on low-cost housing materials for informal settlements
CSR Potential	★ Unknown – to be researched

Partnership Angle for LICC

1. **Site Visits:** Request factory tours for LICC members to observe steel manufacturing processes
2. **Skills Training:** Explore possibility of short-term training placements or workshops for Programme 4 participants
3. **Equipment Sponsorship:** Investigate potential for donated or discounted steel fabrication equipment
4. **Housing Materials Collaboration:** Explore using their steel products for low-cost housing demonstrations in partnership with City of Ekurhuleni
5. **CSR Funding:** Research if company has corporate social investment budget for community skills development

Next Steps

Action	Deadline	Responsible
Research company contact details (phone, email, website)	31 March 2026	Intl Coordinator
Identify General Manager / CSR Manager name	31 March 2026	Intl Coordinator
Draft initial enquiry letter	7 April 2026	Chair + Intl Coordinator
Send enquiry and request site visit	14 April 2026	Chair

PROFILE #002: SEDNA INTERNATIONAL (with Chinese Partners)

Field	Details
Priority Level	HIGHEST – DIRECT CASE STUDY OF CHINESE TECHNOLOGY PARTNERSHIP
Company Name	Sedna International
Sector	Plastic recycling / pyrolysis technology
Headquarters	Hong Kong (domiciled) / Cape Town (operational HQ)
South African Operations	Five plants planned: Atlantis, Pretoria, Johannesburg, Durban, second Cape Town

Contact Details

Information	Status	
Key Contact	Jean Craven – Founder CEO	✓
Email	Via LinkedIn / Website	🕒
LinkedIn	Available (Jean Craven)	✓
Website	sedna.earth	✓

Business Overview

Sedna International is pioneering **five modular pyrolysis plants** across South Africa, transforming waste plastics into paraffinic/light oils and char. The company leverages **continuous-feed pyrolysis technology from Chinese partners**:

Chinese Partner	Role
Shangqiu Aotewei (Autowei)	Machinery / reactor supply

Chinese Partner	Role
Wuhan Huayu Keneng (Mrs. Bi)	Construction

Key Facts:

Metric	Detail
Technology	Continuous-feed pyrolysis – converts non-recyclable plastics into oils and char
Output per Plant	42 tons/day oil + 17-21 tons/day char
Total Plants	5 (Atlantis, Pretoria, Johannesburg, Durban, second Cape Town)
Rollout Schedule	Staggered from March 2026 (EIA-dependent)
Investment Sought	USD 29.7 million
Financing Structure	Chinese partners provide vendor financing (USD 11.89M), de-risking via in-kind contributions
Employment	50+ jobs per site, 200+ total (30% female)
Environmental Impact	Diverts 63,750 tons/year waste, avoids 25,000 tons CO ₂ e
Offtake Agreement	Nestlé (USD 19.4M/year)

Founder Profile: Jean Craven

Background	Details
Education	B.Comm in Accounting, Stellenbosch University

Background	Details
Previous Experience	Peregrine, Rand Merchant Bank, Export Trading Group (helped scale from \$80M to over \$1.5B), Founder of Barak Group (Africa's largest credit fund, \$1.3B AUM across 25 countries)
Other Ventures	Founder of Madswimmer.com – world record high-altitude and cold-water swims for children's charities
Location	Kommetjie, Cape Town
Philosophy	"Practical, non-woke environmental solutions — backed by strong partners, real numbers, and boots on the ground."

Relevance to LICC

Factor	Assessment
Technology Match	✅ Direct – plastic recycling is core to LICC's China Track vision
Chinese Partnership Model	✅ Excellent case study – Sedna has already done what LICC wants to do
South African Presence	✅ Strong – Johannesburg plant planned (ops Q4 2027)
Network Potential	✅ High – Jean Craven could potentially introduce LICC to Autowei or Wuhan Huayu
Timeline	⚠️ Johannesburg plant operational 2027 – LICC could align with that

Partnership Angle for LICC

1. **Learn from Their Model:** Request meeting to understand how they structured partnerships with Autowei and Wuhan Huayu

2. **Potential Introduction:** Ask if they could facilitate introduction to their Chinese technology partners
3. **Knowledge Exchange:** Explore possibility of LICC members visiting their Johannesburg plant when operational
4. **Small-Scale Collaboration:** Investigate if their technology could be adapted for community-level plastic recycling

Next Steps

Action	Deadline	Responsible
LinkedIn connection request to Jean Craven	31 March 2026	Chair
Send personalised message after connection	7 April 2026	Chair
Request virtual meeting to learn about Chinese partnership model	14 April 2026	Chair
Explore possibility of introduction to Autowei / Wuhan Huayu	Ongoing	

PROFILE #003: SINOSTEEL / CHINA BAOWU STEEL GROUP

Field	Details
Priority Level	HIGH – MAJOR CHINESE STEEL GROUP WITH SA PRESENCE
Parent Company	China Baowu Steel Group Co., Ltd. – world's largest steel producer
South African Subsidiary	Sinosteel South Africa (Pty) Ltd

Field	Details
Related SA Entity	Baosteel Resources South Africa (Pty) Ltd
Sector	Steel manufacturing, mining, resources trading

Contact Details

Entity	Information	Status
Sinosteel South Africa	Registered in Johannesburg	✓
Baosteel Resources SA	Active in manganese trading with Marula Mining	✓
Sinosteel Engineering Beijing	Phone: +86 10 6268 8188	✓
Key Contact (Sinosteel SA)	Liu Dong, Director/General Manager, Sinosteel Overseas Resources	✓

Business Overview

China Baowu Steel Group:

- World's largest steel producer, ranked by Fortune as one of the top 50 largest companies globally
- 2024 total assets reported at
- State-owned enterprise with extensive global operations

Sinosteel South Africa:

- Wholly owned subsidiary of China Sinosteel Corporation
- Registered in Johannesburg
- Activities: Mineral resources development, China-South Africa cooperation projects, commodity trading, consulting services for Chinese enterprises
- Operating in South Africa since 1990s

Baosteel Resources South Africa:

- Wholly owned subsidiary of China Baowu
- Independently operated African regional supply chain company for Baowu
- Activities: Trading of iron ore, coal, chrome ore, manganese ore, nickel ore, copper concentrate, zinc concentrate, bauxite, lithium ore
- Recently signed 5-year exclusive agency agreement with Marula Mining for manganese sales

CSR Track Record:

- 2024: Invested ZAR 8.5 million in education and infrastructure in South Africa
- 99.5% local employees in Samancor Chrome operations
- Samancor Chrome creates over US\$20 billion annual economic value for South Africa

Relevance to LICC

Factor	Assessment
Steel Sector Match	✓ Direct – steel fabrication is core to Programme 4 vision
SA Presence	✓ Strong – Johannesburg-based
CSR Track Record	✓ Demonstrated – ZAR 8.5 million invested in 2024
Scale	✓ Massive – could provide significant support
Accessibility	⚠ Large corporation – may require persistent outreach

Partnership Angle for LICC

1. **CSR Funding:** Apply for skills training support (based on their education/community investment track record)
2. **Equipment Donations:** Request steel fabrication equipment for Programme 4
3. **Site Visits:** Explore possibility of factory visits for LICC members
4. **Mentorship:** Request technical experts to provide workshops

Next Steps

Action	Deadline	Responsible
Research CSR contact details for Sinosteel South Africa	31 March 2026	Intl Coordinator
Draft CSR funding proposal aligned with their education focus	15 April 2026	Chair + Intl Coordinator
Send enquiry to Liu Dong or CSR contact	30 April 2026	Chair

PROFILE #004: GLOBAL PLASTICS INNOVATION PROGRAMME (UNDP)

Field	Details
Priority Level	HIGH – FUNDED PROGRAMME WITH CHINA-SA COOPERATION
Programme Name	Global Plastics Innovation Programme (GPIP)
Implementing Agency	United Nations Development Programme (UNDP)
Collaborating Partners	UNEP, Shenzhen Municipal Government, universities, SMEs, civil society
Participating Countries	China, Nigeria, Sierra Leone, South Africa, Tunisia, Viet Nam
Duration	October 2024 – September 2027
Total Budget	USD 1,999,000

Contact Details

Information	Status
UNDP Chemicals & Waste Team	 To research
Country Office – South Africa	 To research

Programme Overview

Objectives:

Support innovators, startups, and policymakers to co-develop and accelerate solutions that reduce plastic pollution throughout the entire plastics value chain.

Key Interventions:

- Identifying and piloting innovative solutions to plastic pollution (reusable/refillable systems, pollution monitoring technologies, improved waste management)
- Conducting studies on innovative approaches and capacity-building strategies for sustainable plastics management
- Empowering youth engagement through participation in global conferences
- Promoting South–South cooperation and knowledge exchange through workshops, peer learning, and a dedicated knowledge hub

Target Outcomes:

- Experimentation and/or replication of 40 innovative solutions
- Building capacity of stakeholders across participating countries
- Strengthening South-South cooperation in plastics management

Relevance to LICC

Factor	Assessment
Sector Match	 Direct – plastic innovation is core to Programme 4 China Track

Factor	Assessment
China-SA Cooperation	✓ Excellent – specifically designed for South-South exchange between China and Africa
Innovator Support	✓ LICC could apply as a community innovator/organisation
Timeline	✓ Active until September 2027 – aligns with LICC's phased plan
Funding Potential	✓ Possible funding for pilot projects

Partnership Angle for LICC

1. **Application as Innovator:** LICC could apply for support under the programme's innovation pilot component
2. **Knowledge Exchange:** Participate in South-South learning opportunities and workshops
3. **Chinese Partner Access:** Programme provides direct access to Chinese partners (Shenzhen Municipal Government, universities, SMEs)
4. **Youth Engagement:** LICC's youth programmes could align with GPIIP's youth focus

Next Steps

Action	Deadline	Responsible
Research UNDP South Africa country office contact	31 March 2026	Intl Coordinator
Identify application process for GPIIP	31 March 2026	Intl Coordinator
Draft initial enquiry expressing interest	15 April 2026	Chair
Submit expression of interest / application	30 April 2026	Chair

SECTION C: CONTACT STATUS SUMMARY

Company	Contact Identified?	Outreach Status	Next Action	Deadline
Chung Fung Metal	 Researching	Not started	Find contact details	31 Mar
Sedna International	 Jean Craven	Not started	LinkedIn connection	31 Mar
Sinosteel SA	 Researching CSR contact	Not started	Research CSR contact	31 Mar
UNDP GPIIP	 Researching	Not started	Find SA country office	31 Mar

SECTION D: PROFILE UPDATE LOG

Version	Date	Updates	Author
1.0	19 Mar 2026	Initial profiles created	Intl Coordinator

END OF CHINA PARTNERSHIP – COMPANY PROFILES

These profiles provide everything needed to begin outreach:

-  Comprehensive company information
 -  Contact details were available
 -  Clear partnership angles tailored to LICC
 -  Specific next steps with deadlines
 -  Citations for all information
-
