SECTION A: MASTER OUTREACH EMAIL TEMPLATE

To: [_____]

Cc: Mzolisi Malusi

Subject: Partnership Opportunity: [Specific Focus – e.g., Steel Manufacturing / Plastic Recycling] – Community Development in South Africa

Date: [_____]

Dear [Mr./Ms. Name / Sir/Madam],

I hope this email finds you well. I am writing from **Liwelile Impumelelo Community Centre**, a registered non-profit organisation (NPO 167-542) based in Germiston, South Africa, serving vulnerable communities in the informal settlements of Marathon and Ramaphosa.

About Us

After nine years of voluntary community service, we have recently established a **multi-purpose community campus** at 22 Fox Glove Avenue, Primrose, delivering **five integrated programmes** that address hunger, isolation, unemployment, and youth development. Our vision is to move beyond service delivery into **community-led manufacturing and skills development**.

Why We Are Reaching Out

We are developing a **Skills Development Programme (Programme 4)** with a specific track focused on **advanced manufacturing and plastic recycling/steel fabrication**, inspired by China's world-leading expertise in these fields. Our goal is not just training – it is **technology transfer, skills exchange, and lasting partnership** that will enable our community to:

- Turn plastic waste into low-cost building materials

- Develop basic steel fabrication capabilities
- Create local employment and enterprise opportunities
- Partner with the City of Ekurhuleni on housing solutions for informal settlements

Why [Company Name]

We have identified your Company as a potential partner because:

- [Specific reason 1 – "your investment in the Kaydale steel plant in Nigel demonstrates your commitment to South African manufacturing"]
- [Specific reason 2 – "your expertise in plastic pyrolysis technology aligns with our vision of waste-to-value"]
- [Specific reason 3 – "your track record of community investment and skills development in South Africa"]

What We Are Seeking

We would be honoured to explore a partnership that could include:

Area	Description
Skills Transfer	Opportunities for our members to learn from your expertise – through site visits, workshops, or training placements
Technology Access	Advice on appropriate machinery and equipment for community-level manufacturing
Potential Equipment Support	Donation of refurbished equipment or assistance in sourcing affordable technology
Knowledge Exchange	Sharing of best practices in manufacturing, safety, and quality control
Cultural Exchange	Building mutual understanding and long-term friendship between our communities

What We Offer in Return

Asset	Value to Partner
Community Access	Real-world testing ground for low-cost housing solutions using your materials/technology
Demonstration Site	Visible showcase of your commitment to community development in South Africa
Authentic Story	Powerful narrative for your CSR and sustainability reporting
Local Knowledge	Understanding of informal settlement challenges and opportunities
Commitment	Serious, organised partner with professional governance and financial systems

Next Steps

I would be grateful for the opportunity to:

1. Introduce our organisation more fully (I have attached our **International Partnership Strategy** and **Skills Development Programme Proposal**)
2. Arrange a virtual meeting to discuss potential collaboration
3. Explore a site visit to your [facility / South African operations] if appropriate

Thank you for considering this request. I understand you are busy, but I believe there is real potential for a partnership that benefits both our community and your organisation's commitment to positive impact in South Africa.

I look forward to hearing from you.

Yours faithfully,

Mzolisi Malusi

Chairperson

SECTION B: CUSTOMISATION NOTES BY TARGET**B1: For Chung Fung Metal (Nigel Steel Plant)**

Element	Customisation
Subject	Partnership Opportunity: Steel Manufacturing & Community Skills Development – Germiston
Why [Company Name]	"We have learned of your impressive ZAR 2.5 billion steel plant in Nigel, just 30-40km from our centre. Your investment in South African manufacturing and creation of 1,000 local jobs is exactly the kind of commitment we admire."
Specific Ask	"We would be honoured to arrange a site visit to your Nigel facility for our members to observe steel manufacturing processes, and to explore how we might collaborate on skills training for our community."

B2: For Sedna International (Jean Craven)

Element	Customisation
Subject	Learning from Your Model: Chinese Technology Partnership for Plastic Recycling in SA
Why [Company Name]	"We have followed your work with great interest – your pioneering partnership with Autowei and Wuhan Huayu to bring pyrolysis technology to South Africa is exactly the model we hope to learn from. Your commitment to practical, non-woke environmental solutions resonates deeply with our approach."

Element	Customisation
Specific Ask	"We would be grateful for the opportunity to learn from your experience – perhaps a brief virtual meeting to understand how you structured your partnerships with Autowei and Wuhan Huayu, and any advice you might have for a community organisation seeking similar technology transfer."

B3: For Sinosteel / China Baowu

Element	Customisation
Subject	Partnership Opportunity: Steel Skills Development & Community Investment
Why [Company Name]	"We understand that Sinosteel has operated in South Africa since the 1990s and, through Samancor Chrome, has created over US\$20 billion in economic value while maintaining 99.5% local employment. Your 2024 investment of ZAR 8.5 million in education and infrastructure demonstrates a genuine commitment to South African communities."
Specific Ask	"We would be grateful to explore how your CSR programme might support our skills development efforts – whether through training, mentorship, equipment, or funding for our steel fabrication track."

B4: For UNDP Global Plastics Innovation Programme

Element	Customisation
Subject	Expression of Interest: Community-Led Plastic Recycling Innovation – South Africa
Why [Programme]	"We understand that the Global Plastics Innovation Programme specifically supports South-South cooperation between China and African countries and works with innovators and communities to develop plastic pollution solutions. Our vision of turning plastic waste

Element	Customisation
	into low-cost building materials for informal settlements aligns directly with your objectives."
Specific Ask	"We would be grateful for guidance on how our organisation might apply for support under this programme, and whether there are opportunities for engagement with your Chinese partners (Shenzhen Municipal Government, universities, SMEs) as we develop our plastic recycling track."
